SUMMARY

Full Stack Developer with 1 year of hands-on experience building scalable web applications using React, Next.js, and .NET. Proficient in developing responsive UIs, integrating backend APIs, and managing databases. Strong collaborator with a passion for clean code, Agile methodologies, and delivering user-focused solutions in fast-paced environments.

TECHNICAL SKILLS

- Backend: .NET, C#, EF Core, RESTful APIs
- Database: MySQL, MongoDB
- Frontend: React.js, Next.js, JavaScript, HTML, CSS
- UI Libraries: Material-UI, Tailwind CSS and Bootstrap
- Version Control: Git, GitHub
- Development Practices: Agile, SCRUM (basic knowledge)

EDUCATION

- Bachelor of Computers and Data Science | 2023 Alexandria University, Egypt
- CGPA: 3.67

PROJECTS

Blood Donation Application

- Developed a donation platform using React.js and Next.js, deployed on Vercel
- Designed responsive UI components and implemented state management with Redux
- Built and connected a MongoDB database for donor/user data storage
- Collaborated with backend services and followed clean architecture practices
- Achieved performance optimization, reducing load time by ~40%

CERTIFICATIONS

- AppSoft: Introduction to IoT Certification

LANGUAGES

- Arabic (native)

- English (good)
